

## PADARATNALAKṢAṆA

*Aithal (p. 195-196, entry number 294) gives the beginning and end of the text Ṛgvedapada-ratna(-paribhāṣā). It is also called Ekākṣarī Baiṭh-paribhāṣā (Aithal: p.257, entry number 421) and Padaratnalakṣaṇa.*

*The Ekākṣarī (consisting of one syllable) Baiṭh code gives the following informations about those words in the Padapāṭha which belong to a varga of the Ṛgveda Saṁhitā:*

1. Number of words to which iti is added (pragrhya and rephī words)
2. Information if the number of words ending in “n” is odd or even.
3. Information if the number of words ending in visarga is odd or even.
4. Information if the number of compound words (containing the avagraha) is odd or even.
5. Information if the last group of 5 words (pañcaka) contains 1, 2, 3, 4 or 5 words.
6. Information if the total number of the words ending in si, tu and se is odd or even.

*In the book Ekākṣarī Baiṭhparibhāṣā (2014) by Dr. Bhagyalata Pataskar the Ekākṣarī Baiṭh code is explained in detail. On the basis of these explanations I prepared the chart shown in the appendix. This chart and the following examples are a short-cut to understand the Ekākṣarī Baiṭh code.*

### Paribhāṣā (Aithal 294)

nāntaṁ visargāntamathāvagrhyaṁ syantaṁ tu sentaṁ viṣamaṁ samaṁ ca |
